1. Prove that the following derivability relation holds in $P D$.
$\{(\exists \mathrm{x})(\forall \mathrm{y})[(\mathrm{Ay} \& \mathrm{By}) \supset \mathrm{Cxy}],(\forall \mathrm{y})(\mathrm{Ay} \supset \mathrm{By})\} \vdash(\forall \mathrm{y})(\mathrm{Ay} \supset(\exists \mathrm{x}) \mathrm{Cxy})$

| $\begin{aligned} & (\exists \mathrm{x})(\forall \mathrm{y})[(\mathrm{Ay} \& \mathrm{By}) \supset \mathrm{Cxy}] \\ & (\forall \mathrm{y})(\mathrm{Ay} \supset \mathrm{By}) \end{aligned}$ | Assumption Assumption |
| :---: | :---: |
| $(\forall y)[($ Ay \& By $) ~ \supset ~ C a y] ~$ | Assumption |
| Ac | Assumption |
| $\mathrm{Ac} \supset \mathrm{Bc}$ | $2 \forall \mathrm{E}$ |
| Bc | $45 \supset \mathrm{E}$ |
| Ac \& Bc | 46 \& I |
| $(\mathrm{Ac} \& \mathrm{Bc}) \bigcirc \mathrm{Cac}$ | $3 \forall \mathrm{E}$ |
| Cac | $78 \supset \mathrm{E}$ |
| $(\exists \mathrm{x}) \mathrm{Cxc}$ | $9 \exists \mathrm{I}$ |
| $\mathrm{Ac} \supset(\exists \mathrm{x}) \mathrm{Cxc}$ | $4-10$ I |
| $(\forall y)($ Ay $\supset(\exists \mathrm{x}) \mathrm{Cxy})$ | $11 \forall$ I |
| $(\forall y)($ Ay $\supset(\exists \mathrm{x}) \mathrm{Cxy})$ | $13-12 \exists \mathrm{E}$ |

2. Symbolize the following argument, revealing as much structure as possible and providing a symbolization key. Show that it is valid in $P D$.

Someone took something from the shelf. Anyone who took anything from the shelf was in the room last night. Therefore, someone was in the room last night.

UD: Everything

| $s:$ the shelf | $r:$ the room |
| :--- | :--- |
| $P x: x$ is a person | Ixy: $x$ was in $y$ last night |

Txyz: x took y from z

| 1 | $(\exists \mathrm{x})(\mathrm{Px} \& \&(\exists \mathrm{y}) \mathrm{Txys})$ | Assumption |
| :---: | :---: | :---: |
| 2 | $(\forall \mathrm{x})[\mathrm{Px} \supset((\exists \mathrm{y})$ Txys $\supset \mathrm{Ixr})]$ | Assumption |
| 3 | Pa \& ( $\exists y$ )Tays | Assumption |
| 4 | Pa | 3 \& E |
| 5 | ( $\exists \mathrm{y}$ ) Tays | $3 \& \mathrm{E}$ |
| 6 | Tabs | Assumption |
| 7 | Pa $\supset((\exists \mathrm{y})$ Tays $\supset \mathrm{Iar})$ ) | $2 \forall \mathrm{E}$ |
| 8 | $(\exists y)$ Tays $\supset$ Iar | $47 \supset \mathrm{E}$ |
| 9 | Iar | $58 \supset \mathrm{E}$ |
| 10 | Pa \& Iar | 49 \& I |
| 11 | $(\exists x)($ Px \& Ixr) | $10 \exists \mathrm{I}$ |
| 12 | $(\exists \mathrm{x})(\mathrm{Px} \& \mathrm{Ixr})$ | 5 6-11 $\exists \mathrm{E}$ |
| 13 | $(\exists \mathrm{x})(\mathrm{Px} \& \mathrm{Ixr})$ | $13-12 \exists \mathrm{E}$ |

3. Prove the equivalence of the following two sentences in $P D+$.
$(\forall \mathrm{x})(\mathrm{Ax} \supset \mathrm{Bx}), \sim(\exists \mathrm{x})(\mathrm{Ax} \& \sim \mathrm{Bx})$

| 1 | $(\forall \mathrm{x})(\mathrm{Ax} \supset \mathrm{Bx})$ | Assumption |
| :--- | :--- | :--- |
| 2 | $(\forall \mathrm{x})(\sim \mathrm{Ax} \vee \mathrm{Bx})$ | 1 Impl |
| 3 | $(\forall \mathrm{x})(\sim \mathrm{Ax} \vee \sim \sim \mathrm{Bx})$ | 2 DN |
| 4 | $(\forall \mathrm{x}) \sim(\mathrm{Ax} \& \sim \mathrm{Bx})$ | 3 DeM |
| 5 | $\sim(\exists \mathrm{x})(\mathrm{Ax} \& \sim \mathrm{Bx})$ | 4 QN |
|  |  |  |
| 1 | $\sim(\exists \mathrm{x})(\mathrm{Ax} \& \sim \mathrm{Bx})$ | Assumption |
| 2 | $(\forall \mathrm{x}) \sim(\mathrm{Ax} \& \sim \mathrm{Bx})$ | 1 QN |
| 3 | $(\forall \mathrm{x})(\sim \mathrm{Ax} \vee \sim \sim \mathrm{Bx})$ | 2 DeM |
| 4 | $(\forall \mathrm{x})(\sim \mathrm{Ax} \vee \mathrm{Bx})$ | 3 DN |
| 5 | $(\forall \mathrm{x})(\mathrm{Ax} \supset \mathrm{Bx})$ | 4 Impl |

4. Prove that the following is a theorem of $P D I+$.
$\mathrm{Fa} \equiv(\exists \mathrm{y})(\mathrm{y}=\mathrm{a} \& \mathrm{Fy})$

| 1 | Fa | Assumption |
| :---: | :---: | :---: |
| 2 | $(\forall \mathrm{x}) \mathrm{x}=\mathrm{x}$ | = I |
| 3 | $\mathrm{a}=\mathrm{a}$ | $1 \forall \mathrm{E}$ |
| 4 | $\mathrm{a}=\mathrm{a} \& \mathrm{Fa}$ | 13 \& I |
| 5 | $(\exists \mathrm{y})(\mathrm{y}=\mathrm{a}$ \& Fa) | $4 \exists \mathrm{I}$ |
| 6 | $(\exists \mathrm{y})(\mathrm{y}=\mathrm{a} \& \mathrm{Fa})$ | Assumption |
| 7 | $\mathrm{b}=\mathrm{a} \& \mathrm{Fa}$ | Assumption |
| 8 | Fa | 7 \& E |
| 9 | Fa | $67-8 \exists \mathrm{E}$ |

5. Prove that the following set of sentences is inconsistent in $P D$.
$\{(\forall \mathrm{x})(\forall \mathrm{y})(\mathrm{Fxy} \supset \mathrm{Fyx}),(\forall \mathrm{x})(\forall \mathrm{y})(\mathrm{Fxy} \supset \sim \mathrm{Fyx}),(\exists \mathrm{x})(\exists \mathrm{y}) \mathrm{Fxy}\}$

| 1 | $(\forall \mathrm{x})(\forall \mathrm{y})(\mathrm{Fxy} \supset \mathrm{Fyx})$ | Assumption |
| :---: | :---: | :---: |
| 2 | $(\forall \mathrm{x})(\forall \mathrm{y})(\mathrm{Fxy} \supset \sim \mathrm{Fyx})$ | Assumption |
| 3 | ( $\exists \mathrm{x})(\exists \mathrm{y}) \mathrm{Fxy}$ | Assumption |
| 4 | (ヨy)Fay | Assumption |
| 5 | Fab | Assumption |
| 6 | $(\forall y)($ Fay $\supset \mathrm{Fya})$ | $1 \forall \mathrm{E}$ |
| 7 | $\mathrm{Fab} \supset \mathrm{Fba}$ | $6 \forall \mathrm{E}$ |
| 8 | Fba | $57 \supset \mathrm{E}$ |
| 9 | $(\forall y)($ Fay $\supset \sim$ Fya) | $2 \forall \mathrm{E}$ |
| 10 | Fab $\supset \sim$ Fba | $9 \forall \mathrm{E}$ |
| 11 | $\sim \mathrm{Fba}$ | $810 \supset \mathrm{E}$ |
| 12 | $\perp$ | $811 \perp \mathrm{I}$ |
| 13 | $\perp$ | 4 5-12 $\exists \mathrm{E}$ |
| 14 | $\perp$ | 3 4-13 |
| 15 | $\sim(\exists \mathrm{x})(\exists \mathrm{y}) \mathrm{Fxy}$ | $14 \perp \mathrm{E}$ |
